

SecureDocs Launches New Built-in Q&A Tool for Better Due Diligence and Faster Deals

Make the Q&A process faster, easier and more secure with a simple, straightforward Q&A tool accessible directly from your virtual data room.

SANTA BARBARA, CALIFORNIA — XX December, 2018 — SecureDocs, an industry-leading [virtual data room provider](#) for secure document sharing and storage, is pleased to introduce new Q&A functionality to the SecureDocs Virtual Data Room platform. With this latest update, SecureDocs users can now manage the Q&A process promptly and effectively directly from their virtual data room.

Complex deals involve a multitude of questions which must be answered quickly and securely, but tracking all this Q&A activity can be challenging. Who sees your documents? Who is authorized to answer? How do you track it all?

[By adding new Q&A functionality](#) to the SecureDocs platform, users can speed up the due diligence process. Even better, because Q&A can be launched from the SecureDocs platform, questions can be posed and answered in real time, meaning there's virtually no lag between an inquiry and a response. You can also ensure all your questions and answers are safe and secure, by managing who can ask questions, who can answer, and who can see the results.

"Adding Q&A functionality to the SecureDocs platform will allow our customers to manage the Q&A process swiftly, efficiently, and securely," explains Will Reynolds, CEO at SecureDocs. "With the SecureDocs Q&A feature, answering questions and performing due diligence is simplified and streamlined. That means better control, more transparency, and faster deals."
