

## **SecureDocs Virtual Data Room to Present Webinar on Identifying and Mitigating Cybersecurity Threats for Business**

*Criminal cyber attacks against corporate organizations are on the rise. Learn how to reduce attack surface, mitigate threats, and prevent losses associated with cyberattacks in this free, live webinar from SecureDocs Virtual Data Room with featured presenter John. P. Lucich.*

Santa Barbara, California ([PRWEB](#)) October 11, 2016 -- [SecureDocs](#), an industry leading virtual data room provider for secure document sharing and storage, and John P. Lucich, a nationally recognized cybercrime expert, are pleased to announce a webinar specifically focused on what organizations can do to better protect themselves and their customer's sensitive data from cyber criminals. This webinar titled, "How to Identify & Mitigate Cybersecurity Threats for Business," will be held on Wednesday, October 26, 2016 at 11:00 am PDT.

This webinar is especially relevant for business leaders and their employees who are interested in understanding, identifying, and mitigating potential data breach disasters before they occur. In this webinar featured speaker, John P. Lucich, President at High Tech Crime Network, will present an in depth analysis of the current cyberattack landscape, and give detailed instructions on what businesses can do to prevent both internal data leaks, and external attacks.

During this 60 minute webinar Lucich will introduce and examine critical topics regarding corporate data security, including:

- The common reasons why network intrusions occur
- The direct and indirect impact of a security incident on a business
- The challenges and misconceptions regarding network defense that lead to a false sense of security amongst organizations
- Likely sources of security breaches and what businesses can do to protect against them

Register today to attend this 60-minute webinar on October 26, 2016 at 11AM PST. Click here to register now: <http://nfo.securedocs.com/designing-secure-networks-identifying-and-mitigating-cybersecurity-threats>
